# STEP 6

A cleared person is no longer in confusion about Help or who makes the mock-ups. "Help and Step 6" were the early 1958 clues to clear. These are still used as tests and even when their running is brief, they must be run.

Caution: It is almost fatal to run Step 6 if the rock is not out.

*How to Run Step 6:*

Select simple nonsignificant objects. Run: "In front of that body you mock up a _____ and keep it from going away." "Did you?" "Thank you."

Then use all directions from the body—"Behind that body . . . ," "To the left of that body . . . ," "To the right of that body . . . ," "Above that body . . . ," "Below that body . . . ."

Run 6 objects each on 6 sides of the body on "Keep it from going away," then proceed to "In front of that body you mock up a _____ and hold it still." Same procedure, then "In front of that body you mock up a _____ and make it a little more solid." (There is no acknowledgment by auditor after pc mocks it up and keeps it from going away, etc., or the "Did you?"—there is acknowledgment only after full command is executed. Otherwise acknowledgments will thin the pc's mock-ups.)

Note: The objects should be simple at first, leading on up to complexity. But at first, keep them simple and nonsignificant.

Read and understand *Scientology 8-8008*, and use an E-Meter throughout.

A valuable side process here: "Decide to make a mock-up. Decide that will ruin the game. Decide not to do it." Also this one: "Decide to make a mock-up everyone can see. Decide that would ruin the game. Decide not to do it."

\* \* \*

In the above there are several roads to Clear. But there are also several levels of case to be cleared. Experience tells one what to run. Auditing skill alone gets the experience across.

The original 1947 processes were defeated in the hands of others by lack of auditing drills and skill.

Help and Step 6 do not work on low level cases to make clears of everyone—hence the CCHs.

By doing all of the above on every case you would certainly have clears in all cases. As your experience increases you can begin to omit steps.

You will finally be able to adjust the processes to the exact cases you do.

Get the preclear in session, run something. You'll win.
